Jefferson (Jeff) Veloso

Full Stack Software Engineer & Tech Lead · TypeScript · Node.js · NestJS · Angular · Next.js

Lagoa Santa (Belo Horizonte metro area), MG, Brazil · Open to remote roles **Email:** jeffersonveloso_6@hotmail.com
Phone: +55 31 99381-8360 **Portfolio:** jeffersonveloso.dev **LinkedIn:** linkedin.com/in/jefferson-veloso-462195b1

PROFESSIONAL SUMMARY

Full Stack Software Engineer and Tech Lead with 9+ years of experience building web and mobile applications, SaaS products and system integrations that replace manual, spreadsheet-based work. Works end to end in TypeScript, with Node.js/NestJS on the backend and Angular and Next.js on the frontend. Experienced in ERP/CRM integrations (Omie, Zoho CRM), technical leadership and code review. Uses AI-assisted, Spec-Driven Development, from PRDs and technical specs to implementation and AI-powered code review. English B2; open to remote roles.

TECHNICAL SKILLS

Languages	TypeScript, JavaScript, Python
Backend	Node.js, NestJS, Flask, REST APIs, Webhooks
Frontend & Mobile	Angular, Angular Material, Next.js, Ionic, PWA
Data & Infrastructure	PostgreSQL, SQLite, Docker, Keycloak
Integrations	Omie ERP, Zoho CRM
AI	LLM integration, RAG, AI agents, AI-assisted code review (CodeRabbit)
Practices	Spec-Driven Development, Clean Code, Clean Architecture, code review, technical leadership

PROFESSIONAL EXPERIENCE

Full Stack Software Engineer — Valueva — Jun 2025 – Present · Remote

SaaS platform for valuation and Value-Based Management, built for small and mid-sized companies, financial BPOs and consultancies.

- Develop features end to end with TypeScript, NestJS, Next.js and PostgreSQL, turning business requirements into architecture and implementation.
- Build and evolve the valuation, KPI, goal-setting and action-plan modules.
- Apply Spec-Driven Development: PRDs, technical specs and task breakdown before each feature.
- Use AI across planning, implementation and code review, including CodeRabbit on GitHub pull requests.
- Ship and iterate on the MVP based on user feedback.

Integration Developer & Tech Lead (Contractor) — JFV SOFTHOUSE — May 2022 – Present · Remote

Contract work in system integration, process automation and software project management, focused on Omie ERP and Zoho CRM.

- **VMI Security:** Tech Lead and full stack developer on a proposal builder with machine configuration, integrated with Zoho CRM, replacing spreadsheet-based processes; reviewed other developers' code.
- **Cryobras:** built a control panel to manage the Zoho CRM ⇄ Omie ERP integration.
- Built and maintain a solution, used by several companies, that replicates financial records across Omie accounts.
- Developed an MVP financial reconciliation tool that extracts transactions from PDF bank statements and maps them to charts of accounts.
- Delivered custom web applications, SaaS and MVPs, plus AI consulting for automation and software development.

Agruppa Soluções em BackOffice

Jul 2017 – Jun 2022 · Belo Horizonte, Brazil

Full Stack Developer — Apr 2019 – Jun 2022

- Responsible for the backend and the frontend of a purchase order and quotation platform with a manager approval workflow.
- Built and evolved the mobile app and the PWA, including the manager approval flow.
- Developed and maintained the backend REST API, integrated with Omie ERP.

Mid-level Mobile Developer — Jul 2017 – Mar 2019

- Joined as a Developer and was promoted to Mid-level Mobile Developer.

Earlier Experience

- **IT Intern** — Escola Municipal Afonso José da Silva, Confins, Brazil · Mar 2016 – Oct 2016
- **IT Intern** — UniBH (Centro Universitário de Belo Horizonte), Belo Horizonte, Brazil · Mar 2015 – Jan 2016
